# REACH CONFERENCE 2024

---

**REACH Conference 2024** is organized for the fourteenth time combining lecturers and participants from different sectors of industry, authorities, academia and other stakeholders. Now EU chemicals legislation reached the important milestone defined by new policies of European Industrial Deal to complement the Green Deal. To manage all new requirements will be a challenge for all involved. The European Commission published a chemicals strategy for sustainability on 14 October 2020. It is part of the EU's zero pollution ambition, which is a key commitment of the European Green Deal. Some of key elements listed below:

*'safe and sustainable by design',  
'chemicals and circular economy: towards not-toxic material cycles',  
'essential uses',  
'endocrine disruptors',  
'pfas',  
'chemical mixtures – mixture assessment factor',  
'one substance – one assessment',  
'zero-tolerance approach to non-compliance',  
'research, innovations, funding'*
